Industrial CF6 (SLC)

## Industrial CF6 (SLC)

### Overview

Apacer industrial CF6 card is compliant with the CFA 6.0 specifications. Apacer adopts the standard 50-pin connector and SLC chip featuring industry-level stability for the card. It is available in capacities from 512MB to 64GB. The data transfer mode is up to PIO-6, Multi-Word DMA-4 and Ultra DMA-7, with the sequential read/write speed reaching as fast as 110/80 MB/sec. To help data stay correct, this CF6 memory card also supports 72-bit ECC function, wear-leveling function and S.M.A.R.T. (Self-Monitoring, Analysis, and Reporting Technology), thereby substantially enhancing product reliability.

\*The actual available memory on the device is less than what is listed on the package. This is due to small discrepancies in file formats and algorithms used by various operating systems. In addition, a portion of memory space is reserved for system files and data sectors for better performance.
