HAHN QUALITY

Performance that builds trust.

*“Quality will remain after the
price has been forgotten.”*

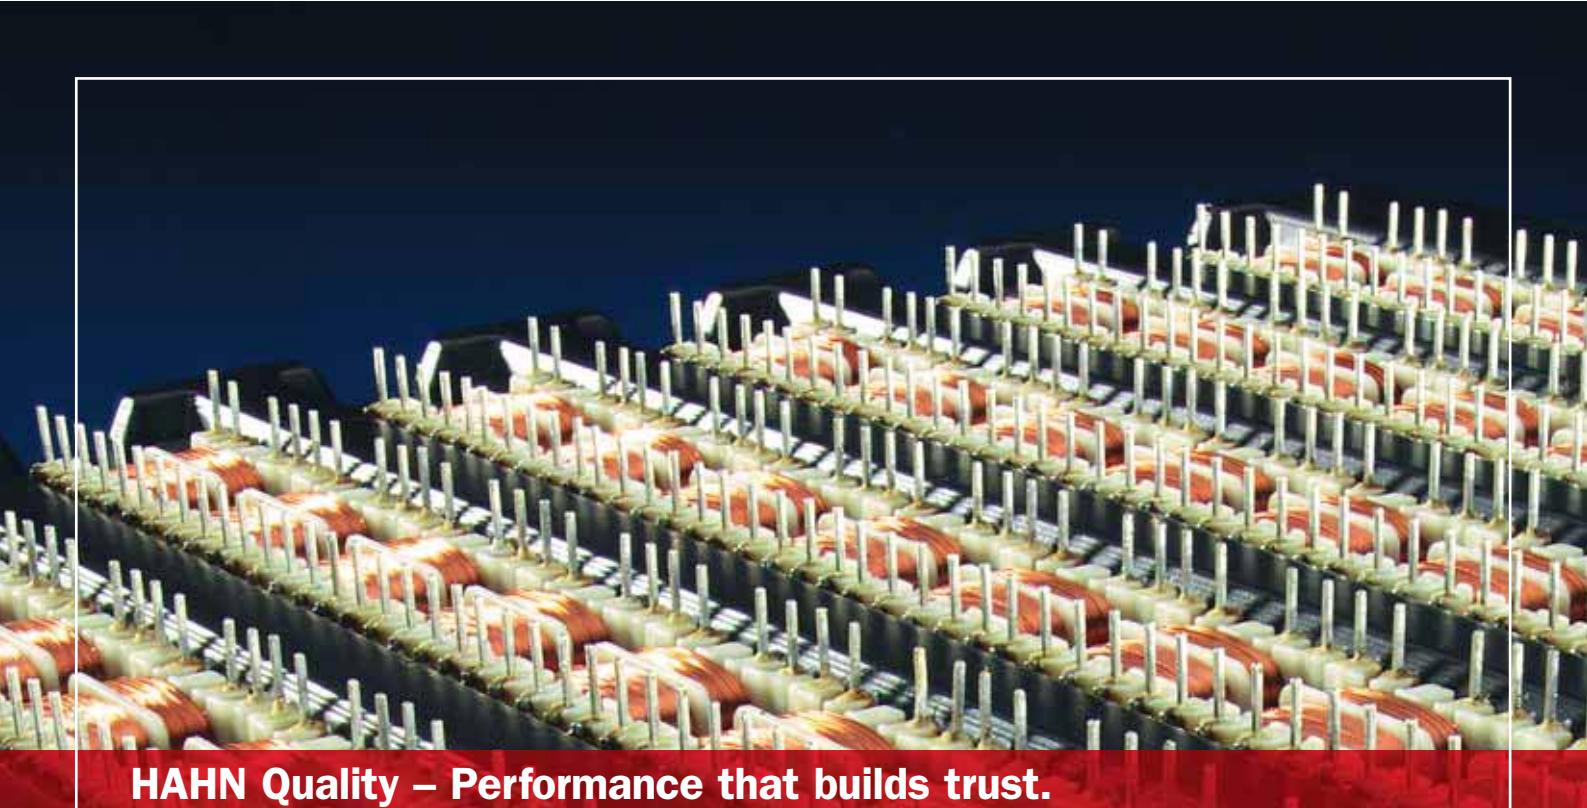

HAHN QUALITY
Performance that builds trust.

At first we can achieve the right potential from electricity!

HAHN has been producing an almost unbelievable volume of several million transformers over the past 40 years. These have ensured the beneficial use of electrical energy by consumers all over the world, e.g. for preparing breakfast in the mornings, when going about the daily housework, in industrial production or, when enjoying the relaxing entertainment program in the evenings.

HAHN transformers are an indispensable aid everywhere, converting high voltage from wall power sockets to a serviceable source of lower current voltage. The maxim 'Performance that builds trust' has made HAHN's transformers renowned all over the world.

HAHN Quality – Performance that builds trust.

This has been the corporate philosophy of the HAHN company since its foundation in 1949. Right from the start, it was the maxim of HAHN to supply products of high quality and to base all efforts on customer-requirements and satisfaction. Corporate growth has been achieved to a dynamic and reliable extent. The ongoing expansion of the manufacturing facilities furthered the improvement in quality and HAHN was able to invest in new products. Today, HAHN employs a workforce of approaching 500, which serve an international clientele in various industrial sectors. HAHN's principal aim is to continue to supply quality products and to provide reliable customer service and thus contribute to the success of its customers.

- 1949** Founded on April 21st, the company was registered as an armature winding works, repair shop for electric motors, generators, electrical installations and the sale of domestic electrical appliances.
- 1969** September – commencement of small size transformer production in the storage space of the newly renovated electrical installation shop.
- 1971** Construction of the first new hall building of 700 square meters floor space.
- 1981** Opening of new production and warehouse hall of 1,600 total square meters floor space.
- 1985** Extension of the production floor space by some 600 square meters.
- 1990** Extension of the storage space by some 500 square meters.
- 1994** Removal of the final inspection and quality control facility and the standard transformer inventory into a new hall building of some 1,000 square meter floor space.
- 1995** A new raw materials' and semi-finished products' warehouse was constructed with a floor area of some 600 square meters.
- 1996** New warehouse and goods' consignment facility was constructed with a floor space of some 600 square meters.
Award of the DIN EN ISO 9001:1994 certification
- 1998** A new reception area was opened. Production capacity was extended by 20%.
Commissioning of the new manufacturing facility in Güsten. Extension of the trading floor space by some 20,000 square meters.
- 2002** Award of the DIN EN ISO 9001:2000 certification for the locations at Hunzen and Güsten in Germany.
- 2003** Disposable and re-usable packagings are given the designation 'Blue Angels'.
- 2004** A third manufacturing facility has been set up in the Ukraine.
- 2005** Starting production in our new manufacturing facility in Ukraine.
- 2008** Award of the DIN EN ISO 9001:2000 certification for the location at Novovolynsk (Ukraine)
- 2009/2010** Hunzen Works
Site expansion with warehouse building transformed into high-bay warehouse,
extended staff car park;
Further investments in automation;
Continuous increase in production capacity

The parent company in Hungen, Germany

All the business decisions of HAHN are taken here, just only half an hour away by car from Frankfurt's International Airport; in terms of a qualitative and consumer-oriented corporate cultural philosophy. New, user-friendly products are developed here. Progressive production technology for highest process quality and economically high volume is located here. All employees are trained to satisfy customer requirements all over the world.

Production in Güsten, Saxony-Anhalt, Germany

The rising demand for HAHN products in Eastern European countries made it necessary to transfer partial production into a region near the border in order to reduce logistical costs.

3rd Production Plant in Novovolynsk (Ukraine)

With foundation of the 3rd plant in Eastern Europe, HAHN removed the manual production from plant Hungen and Güsten to Novovolynsk. Custom-made and wage-intensive products made this step necessary to be as one of the leading transformer producer furthermore competitive on the constantly growing market.

HAHN Electronic Component Parts.

Quality awareness, product liability legislation and the growing demands of worldwide markets today make it necessary for equipment and appliance manufacturers to pass on these stringent requirements to their subcontractors and suppliers to ensure, that no component or assembly can become a critical weak-spot. HAHN successfully meets these requirements. All products leaving the HAHN works have been manufactured of high grade, quality-controlled raw materials or semi-manufactures on the most modern production equipment. A quality-management system meeting **DIN EN ISO 9001:2008** German and European standards provides the means for ensuring such high quality.

HAHN permanently maintains a large stock-inventory of all items and sizes. Customers can take advantage of this service as required, by means of placing call orders – no matter what item of size is required – the comprehensive range from capacities 0.35 VA to 200.0 VA is always available. A detailed overview can be found on the following pages of this catalog.

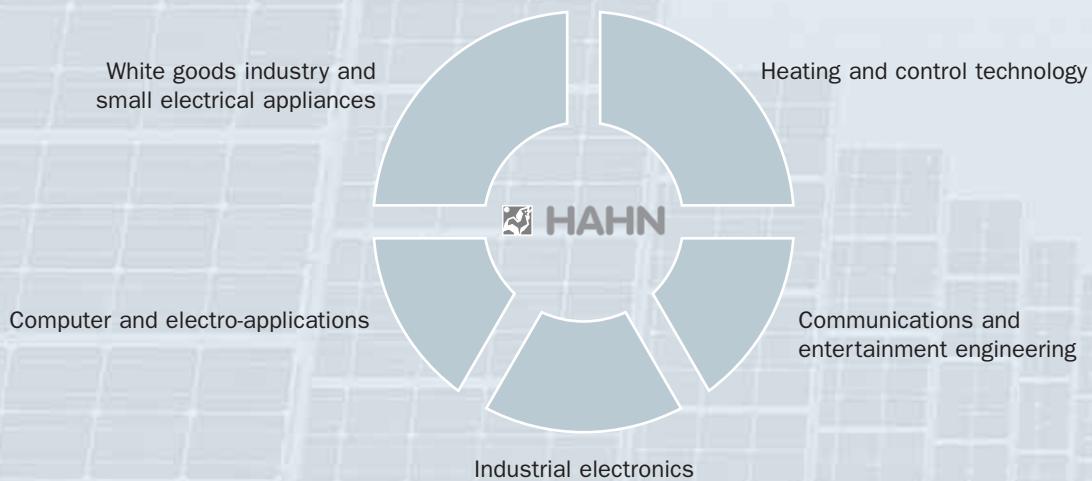

More electrical safety and long service life for consumers' appliances.

- Chokes
- Coils, custom-made coils
- Control transformers
- Current- and voltage converters
- Flat-type transformers
- Inductive assembly components
- Isolating transformers
- Mains transformers
- Printed circuit-board transformers
- Safety transformers
- Single-phase transformers
- Small size transformers
- SMPS-transformers
- Special transformers
- Three-phase transformers
- Ignition transformers and electronic ignition devices

All HAHN transformers carry a test certificate, so that customers obtain an assurance of maximum electrical safety and long service-life for their equipment and appliances. HAHN invites new customers and other interested parties to place their reliance on its quality products and services.

Highest quality and customer-orientated services in all industries

Quality and economy in the production processes.

HAHN products are characterized by their performance and reliability. Ongoing in-house quality control management ensures uncompromising raw material selection and the highest standards of production with the corporate aim of achieving reliability and an optimum of economy and efficiency for customers. To ensure the competitiveness of its products, HAHN attaches great importance to automation in production. Modern technology with automatic assembly lines, integrated quality control devices, transfer systems and 'intelligent' production equipment are the prerequisites for highly rationalised and flexible manufacturing facilities. This minimizes costs and positively influences the marketability of its products. All the corporate-related decisions of HAHN are thus taken from an economic and ecological viewpoint. HAHN already exceeds such requirements by implementing numerous appropriate measures of such a nature. For example, all works-internal movements are carried out with electric vehicles and in the areas of production and distribution, HAHN employs re-useable packaging.

Packed and consigned – all according to customer requirements.

In order to meet the requirements of any specific trade and industry, HAHN can provide practically any desired problem solution in the areas of packing and distribution. No matter whether customers require cases, cartons, polystyrene or plastic packagings – whether ‘just-in-time’ delivery, special forwarding services or self collection – HAHN can always provide customers with the right problem solution. The examples mentioned above meet current standards, whereby the new designed plastic tubes is worthy of special mention. The transformers can thus be extracted from a ‘magazine’ and inserted directly into customers’ production. ESD-conform packaging is contemporary and has come to stay on the European market. HAHN will, of course re-accept packagings returned in a usable condition. These can be cleaned and used again for further consignments to customers.

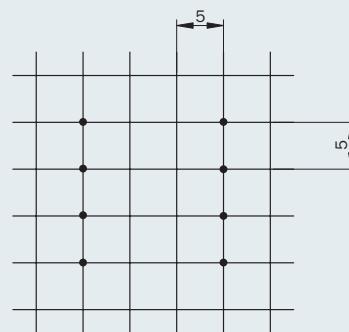

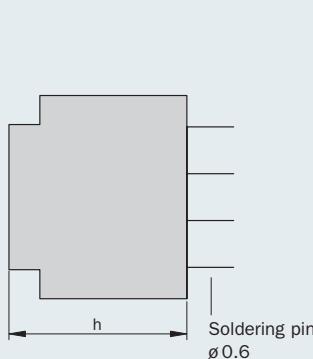

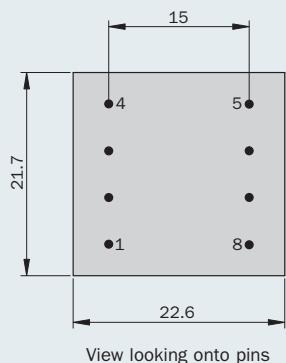

- Minimal sizes available
- Test certifications to ENEC 10-, VDE-, UL- and CSA-regulations
- Primary voltages from 12V to 250V
- Secondary voltages
from 4V to 24V or 2x3V to 2x12V
- High capacity up to 0.5 VA
- Further voltages on demand
- Absolutely short-circuit-proof
- Vacuum-encapsulated, bobbin type with dual chamber windings
- Temperature class ta 70 °C/B
- High electrical safety and long service-life features
- Quality test certified per item
- Excellent temperature fluctuation resistance properties
- Self-extinguishing cast housing and sealing material

Thanks to its minimal size the BV 20 is the ideal problem solution for appliance manufacturers requiring small components and who are not prepared to enter into any comprises as regards quality and performance demands.

Processing with double-coated windings, special extreme heat-resistant epoxy insulating resins and self-extinguishing encapsulation housing materials give HAHN transformers extra electrical safety reserves enabling applications of extreme limits to be addressed.

Dimensions without tolerances ± 0.3 mm,
Rights to make alterations and improvements hereby reserved

The BV 20 with insulation class B properties is especially suitable for printed circuit boards, computer processors, other electronic applications, domestic appliances, telecommunications', lighting and photo technologies.

Particularly in regard to competitiveness on international markets and the product liability of manufacturers, the BV 20 offers users the greatest functional electrical safety and long-life service by reason of its superior quality for their products.

- Minimal sizes available
- Test certifications to ENEC 10-, VDE-, UL- and CSA-regulations
- with VDE certificate for glow wire test in accordance to standard EN 60335-1:2005

Primary voltages
from 12 V to 250 V or 2 x 12 V to 2 x 125 V

Secondary voltages
from 2 V to 38 V or 2 x 2 V to 2 x 19 V

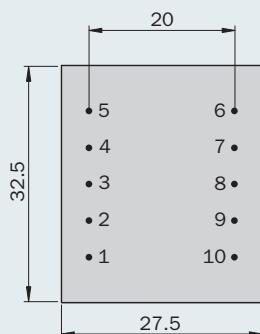

Capacity up to 3.6 VA

- Further voltages on demand
- Short-circuit-proof
- Vacuum-encapsulated, bobbin with dual chamber windings
- Temperature class ta 40 °C/F and ta 70 °C/F

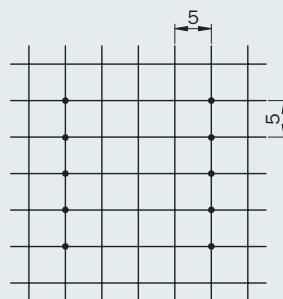

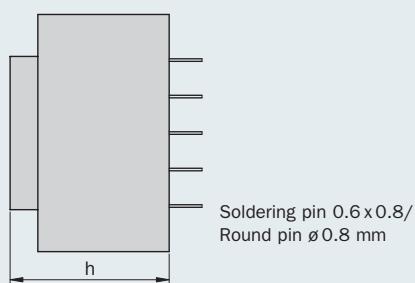

- High electrical safety and long service-life properties
- Quality test certified per item
- Excellent temperature fluctuation resistance properties
- Self-extinguishing cast housing and sealing material

Several hundreds of types provide high electrical safety and long service-life for printed circuit boards, household appliances, leisure electronics, heating and control technology as well as in assembly techniques. Transformers for special requirements with lower open-circuit (no-load) loss capacity are also available in the range.

Enhanced customer benefit due to ongoing high quality standards throughout 40 years experience in transformer technology.

Eco Design – HAHN Solutions

New!

EBPG EuP

New in our product line:

Transformers fulfilling the new guidelines of "Energy using products" (EuP).

The **EuP Serie 2013** of **HAHN** is perfect for applications of the electric power supply in electrical and electronic household and office equipment with "stand by" and "off" conditions. Already today where a **reduced power consumption** of $P_0 < 0,4 \text{ W}$ is required, the **EuP Serie 2013** of **HAHN** will be a solution.

EuP Serie 2013 mit $P_0 < 0,4 \text{ W}$

Equipped for the future – with Hahn

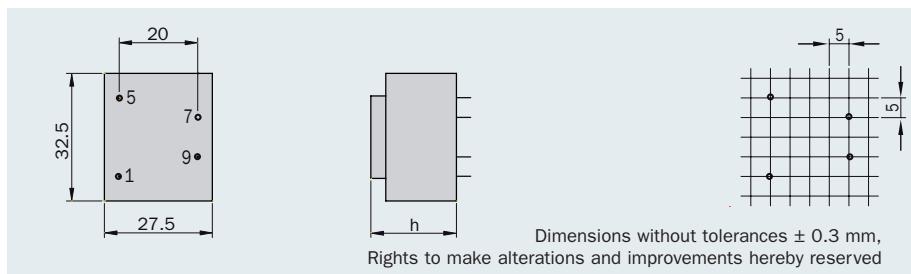

New!

**EBPG
EuP**

Ecological in design – and solutions based on switch mode technology developed by **HAHN**. Within the scope of the Eco-Design Directive for energy-using products, we have expanded our product portfolio for you.

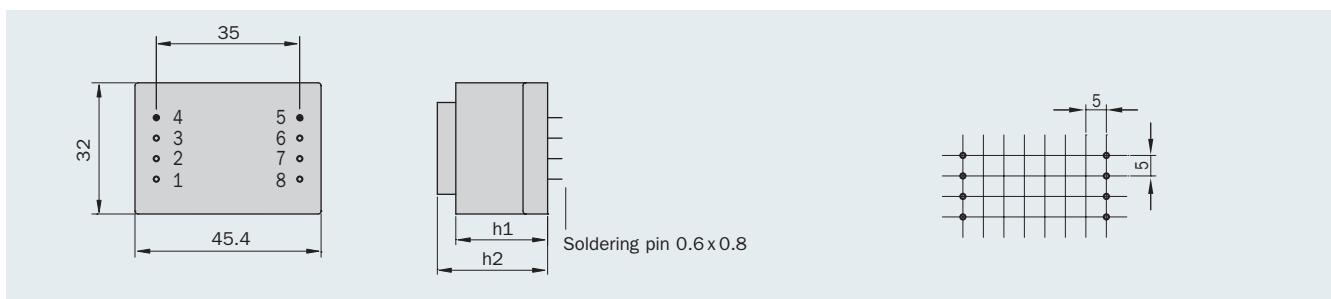

The new **HS series** by **HAHN** incorporating switch mode technology has a voltage transfer loss of < 0.15 W and an efficiency of > 70 %. It is ideal for applications within the broad input voltage range of 85 – 265 V for power supplies.

Dimensions without tolerances ± 0.3 mm,
Rights to make alterations and improvements hereby reserved

Design is short-circuit-proof and wiring is strictly isolated according to EN 61558-2-16, EN 61558-2-17 and EN 60950. All components are UL- and EN 60335-compliant. The safety extra-low output voltage is only max. 3 W.

Flat-type Transformers with Small Base Areas

Height	h1 (mm)	h2 (mm)
EI 30/40/5.5	12.4	16.2
EI 30/40/7.5	14.3	18.1
EI 30/40/10.5	17.2	21.0
EI 30/40/16.5	23.1	26.9
EI 30/40/26	32.9	36.7

Dimensions without tolerances ± 0.3

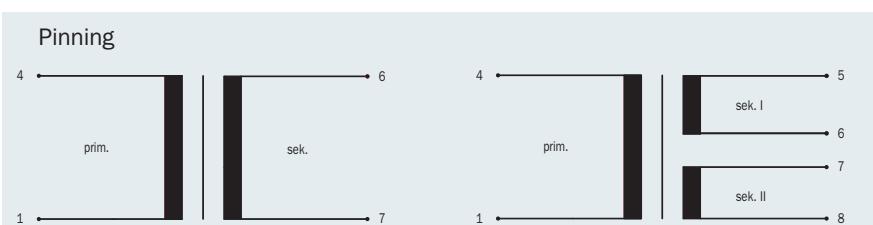

The EI 34 Series provides solutions for applications requiring low heights and a small base areas. HAHN offers rapid and economic problem solutions for customer applications especially developed by our experienced R&D development engineers.

The EI 34 Transformers meet the stringent requirements of the EN 61558 and DIN VDE 0570 standards. Short-circuit-proof and non short-circuit-proof transformers are available in five

different stacking heights. Outputs from 1.6 VA to 8.0 VA, at an ambient temperature of 70 °C, are supplyable to meet customer requirements in encapsulated versions.

HAHN has established itself on the market as a reliable and innovative supplier with its application-oriented solutions. The contact service personnel at HAHN are fully motivated, committed and competent advisers and the success of the company is also to their success.

Safety transformer, **non short-circuit-proof**

- Capacity up to 6.0 VA
- Non short-circuit-proof at temperature class ta 70 °C/B
- Standard type 'O' cast housing
- Test certifications to ENEC 10-, VDE-, CSA- and UL-regulations*
- with VDE certificate for glow wire test in accordance to standard EN 60335-1:2005
- Excellent temperature fluctuation resistance properties
- High electrical safety and long service-life features
- High voltage resistance
- Self-extinguishing cast housing and sealing material
- Certified item quality tested

Primary protection by means of transformer heat coils to IEC 127 standards or secondarily with PTC resistances.

Type 'O' cast housing without fixing straps

Individual EI 48 transformer version

EI 48 transformers, custom-made versions.

Parallel to the catalogued EI 48 series transformers, HAHN also produces other variants, e.g. with integrated thermo fuse or thermo switch, other housing-, fixing- and connective options as well as non-encapsulated transformers.

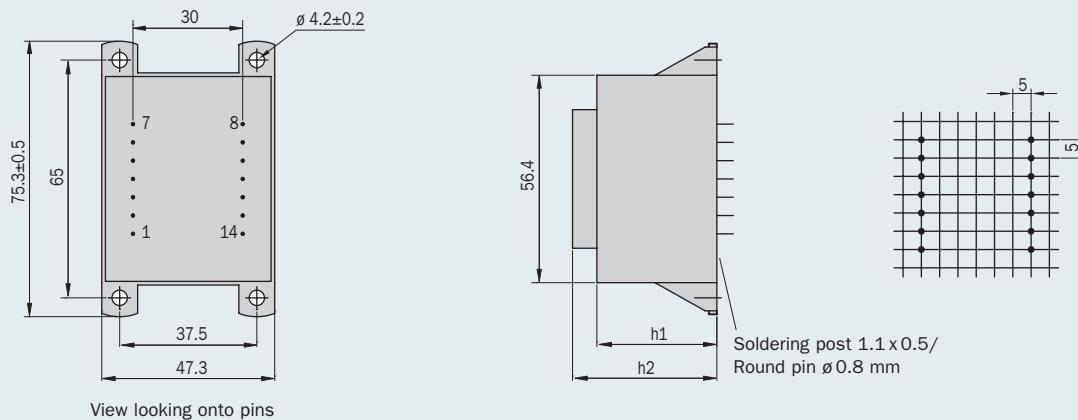

Dimensions in drawings:
 – without tolerances ± 0.3 mm
 – Soldering post 1.1 x 0.5
 – Round pin Ø 0.8

- Capacity up to 22.0 VA
- Non short-circuit-proof at temperature class ta 70 °C/B
- Standard type with 'KK' cast housing
- Test certifications to ENEC 10-, VDE- and UL-regulations*
- with VDE certificate for glow wire test in accordance to standard EN 60335-1:2005
- Excellent temperature fluctuation resistance properties
- High electrical safety and long service-life features
- High voltage resistance
- Self-extinguishing cast housing and sealing material
- Certified item quality tested

Primary protection by means of transformer heat coils to IEC 127 standards or secondarily with PTC resistances.

Individual EI 54 transformer version

EI 54 transformers, custom-made versions.

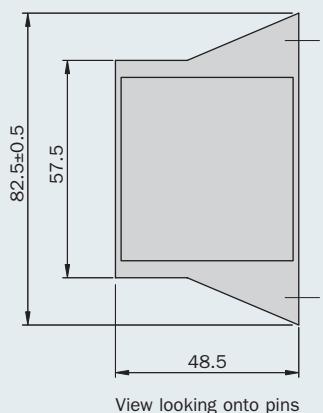

Parallel to the catalogued EI 54 series transformers, HAHN also produces other variants, e.g. with integrated thermo fuse or thermo switch, other housing-, fixing- and connective options as well as non-encapsulated transformers.

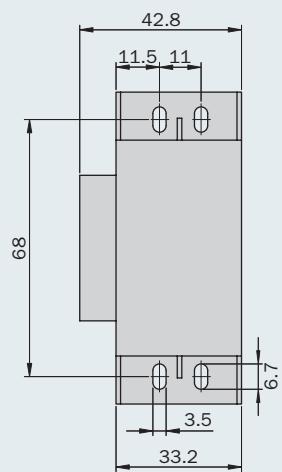

Type 'O' cast housing
without fixing straps

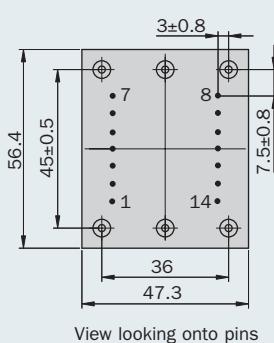

Type 'K' cast housing
with 2 fixing straps

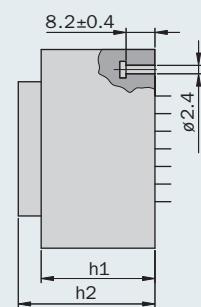

Type 'SV' for
upright mounting

EI 54/18.8

Type 'O' cast housing
with fixing band

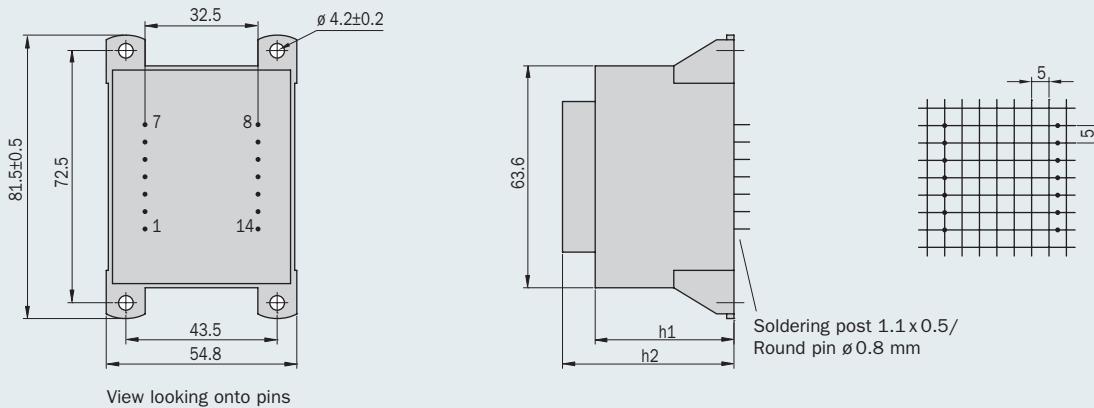

Dimensions in drawings:
– without tolerances ± 0.3 mm
– Soldering post 1.1×0.5
– Round pin $\varnothing 0.8$

- Capacity up to 35.0 VA
- Non short-circuit-proof at temperature class ta 70 °C/B
- Standard type with 'KK' cast housing
- Test certifications to ENEC 10-, VDE- and UL-regulations*
- with VDE certificate for glow wire test in accordance to standard EN 60335-1:2005
- Excellent temperature fluctuation resistance properties
- High electrical safety and long service-life features
- High voltage resistance
- Self-extinguishing cast housing and sealing material
- Certified item quality tested

Primary protection by means of transformer heat coils to IEC 127 standards or secondarily with PTC resistances.

Type 'KK' cast housing with 4 fixing straps

Dimensions without tolerances ± 0.3 mm,
Rights to make alterations and improvements hereby reserved

Individual EI 66 transformer version

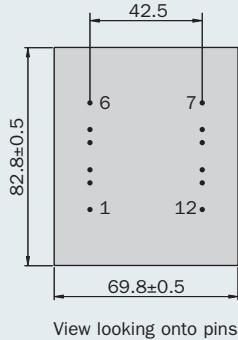

EI 66 transformers, custom-made versions.

Parallel to the catalogued EI 66 series transformers, HAHN also produces other variants, e.g. with integrated thermo fuse or thermo switch, other housing-, fixing- and connective options as well as non-encapsulated transformers.

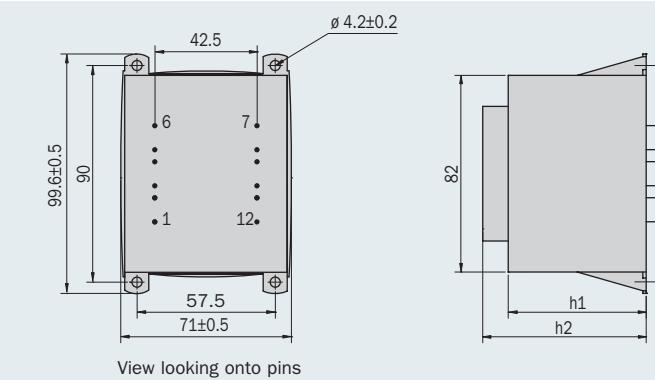

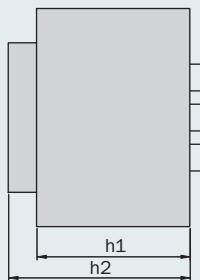

Dimensions in drawings:
– without tolerances ± 0.3 mm
– Soldering post 1.1×0.5 mm
– Round pin $\varnothing 0.8$

Type 'KK' cast housing with 32 connection pins

Custom-made models are available on request, e.g. with or without mounting brackets, other heights, pin configurations or connections.

Type 'SV' for
upright mounting

EI 96/59,7

as well as for transformer version
EI 96/35.7 and EI 96/45.5

Dimensions in drawings:
– without tolerances ± 0.3 mm

– Rights to make alterations and improvements hereby reserved

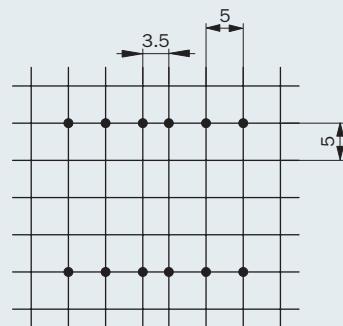

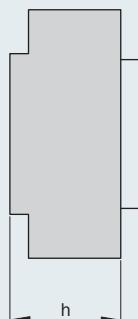

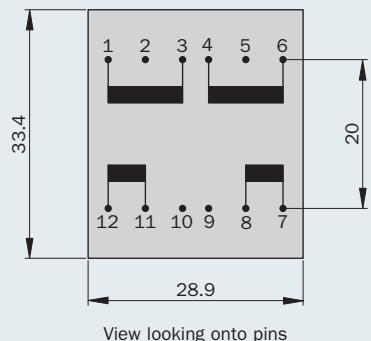

- Capacity up to 1.0 VA
- Temperature class ta 70 °C/B
- Absolutely short-circuit-proof
- Test certification to ENEC 05-, KEMA KEUR-, CSA- and UL-regulations
- Excellent temperature fluctuation resistance properties
- Vacuum-encapsulated, bobbin type with dual chamber windings
- High electrical safety and long service-life features
- High voltage resistance
- Self-extinguishing cast housing and sealing material
- Item quality certification

HAHN flat-type transformers with compact designing, consistent long service-life and durability for all applications.

Several hundreds of serial item sizes provide the highest degree of flexibility wherever flat-type construction components are required. Dual, primary and secondary voltages provide additional flexibility in development work. Approved under Standard EN 61558.

HAHN flat-type transformers UI 21, UI 30, UI 39, UI 48

An extensive standard range with capacities from 1.0–60.0 VA. HAHN transformers are quality products meeting all demands placed on highly developed electro-technical equipment. Of course, item quality certified, vacuum-encapsulated and tested with 6000 V prim./sec. (VDE 0570 and CEE 15 regulations require only 3750 V). Leakage distance and air paths at least 10 mm. Temperature class ta 70 °C/B as per VDE 0570, EN 61558 and CEE 15 regulations/standards. An innovative insulation technique in the provides for even greater primary and secondary voltage stability casting, in all sizes of the UI 30 to UI 39 types.

Safety transformer

- Capacity up to 30.0 VA
- Temperature class ta 70 °C/B, non short-circuit-proof
- Test certifications to ENEC 05-, KEMA KEUR-, CSA- and UL-regulations
- Vacuum encapsulated, bobbin type with dual chamber windings
- Excellent temperature fluctuation resistance properties
- High electrical safety and long service-life features
- High voltage resistance
- Self-extinguishing cast housing and sealing material
- Item quality certification

Secondary protection by means of external PTC resistances.

Parallel to the catalogued UI 39 series transformers, HAHN also produces other variants, e.g. with integrated thermo fuse or thermo switch.

Dimensions without tolerances ± 0.3 mm, Soldering pin 0.6 x 0.8 or $\phi 0.8$,

Safety transformer

- High capacity up to 120.0 VA
- Primary voltages from 12 V to 400 V
- Secondary voltages
from 6 V to 24 V or 2 x 6 V to 2 x 24 V
- Minimal size
- Test certifications to VDE-, ENEC 10-, CSA- and UL-regulations
- with VDE certificate for glow wire test in accordance to standard EN 60335-1:2005
- Vacuum-encapsulated, bobbin with dual chamber windings
- Item quality certification
- Temperature class ta 70 °C/B meeting VDE 0570/EN 61558 regulations
- High electrical safety and long service-life features
- Excellent temperature fluctuation resistance properties
- Self-extinguishing cast housing and sealing material

These transformers are especially characterized by particularly simple and economic appliance installation and provide the same cogent economic- and safety perspectives for equipment- and appliance makers as the EI Series.

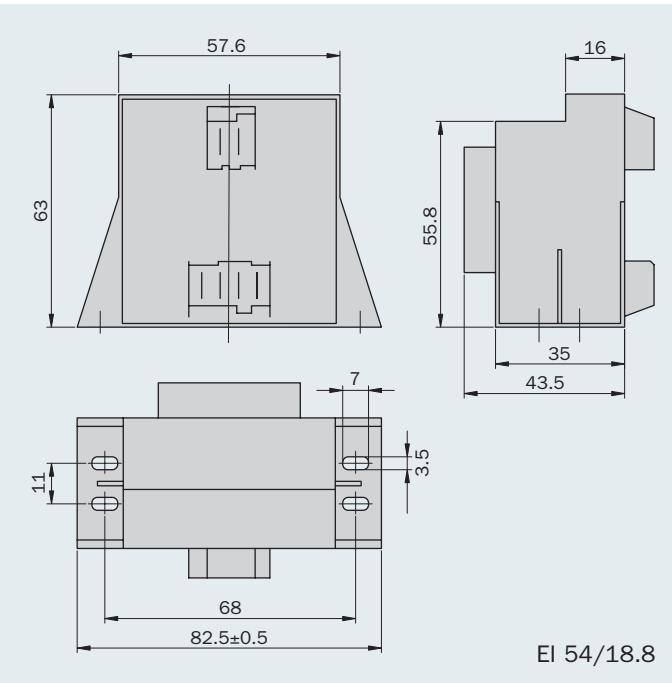

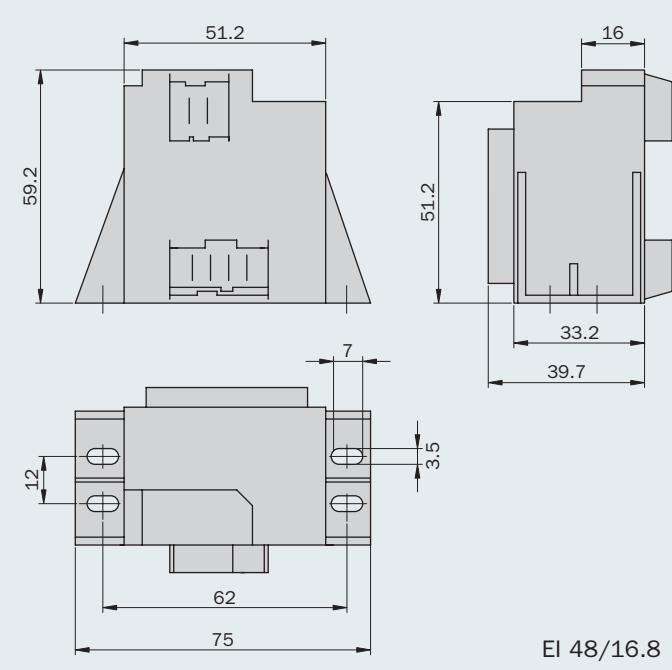

The RAST 5 interconnective techniques developed by HAHN for transformers provide makers of electrical and white goods with assured economical- and electrical safety aspects in the manufacture of appliances.

RAST 5 transformers of the series EI 48 and EI 54

Frame size/Core height	Output	Temperature class
EI 48 / 16.8	10.0 VA	ta 70 °C/B
EI 48 / 20.5	12.0 VA	ta 70 °C/B
EI 54 / 18.8	16.0 VA	ta 70 °C/B

All transformers of the RAST 5 series are equipped with a variable user-friendly parallel-wired connector to VDE 0627/PM 906 (Regulations of the Association of German Electrical Engineers). This greatly facilitates the assembly of the components by as much as a third. It only remains to attach the lead connectors to the primary and secondary sides. The tedious and time-consuming routines of soldering, screw-attachment or individual plug-ins is no longer required. Especially coded connectors with form guides ensure proper assembly. Confusion in connecting up routines is impossible, even for a layman. Lead connectors are prefabricated, thus also reducing costs.

Available on request with the following attributes

Dimensions in drawings:
– without tolerances ± 0.3 mm

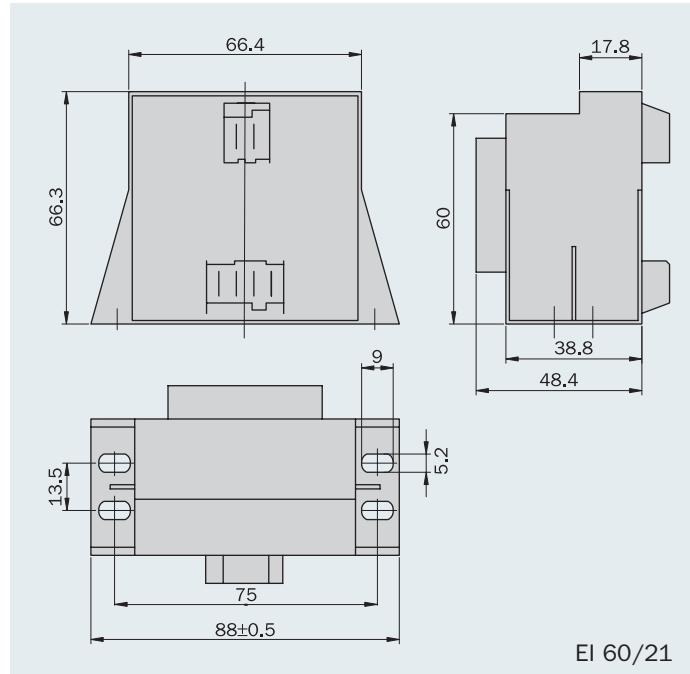

RAST 5 transformers of the series EI 60 and EI 66

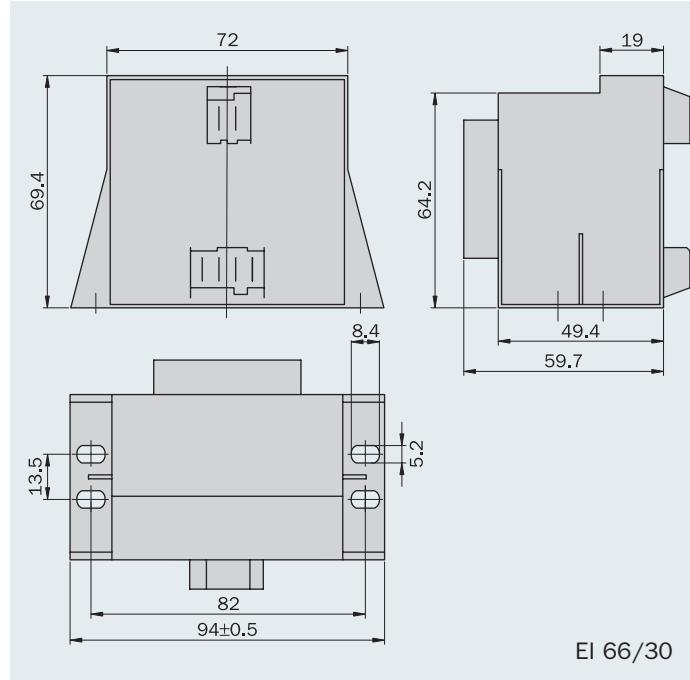

Frame size/Core height	Output	Temperature class
EI 60 / 21.0	20.0 VA	ta 70 °C/B
EI 66 / 30.0	40.0 VA	ta 70 °C/B

Maximum Convenience combined with cogent Quality.

Equipped with service- and user-friendly connective techniques plus the usual quality benefits of the EI transformer series. Designed to customer requirements – capacities from 10.0 VA to 120.0 VA. Temperature class ta 70 °C/B. Vacuum encapsulated items are, subjected of course to 100 % quality control.

EI 60/21

EI 66/30

Available on request with the following attributes

Dimensions in drawings:
– without tolerances ± 0.3 mm

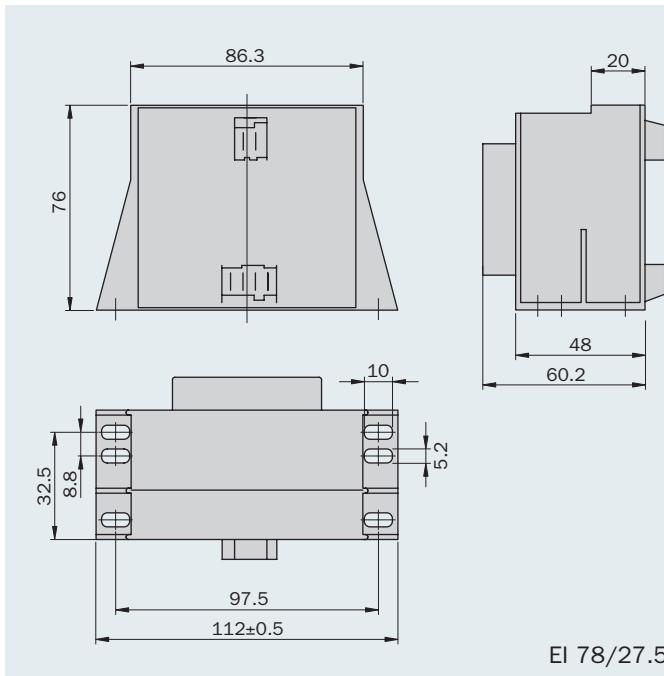

RAST 5 transformers of the series EI 78 and EI 84

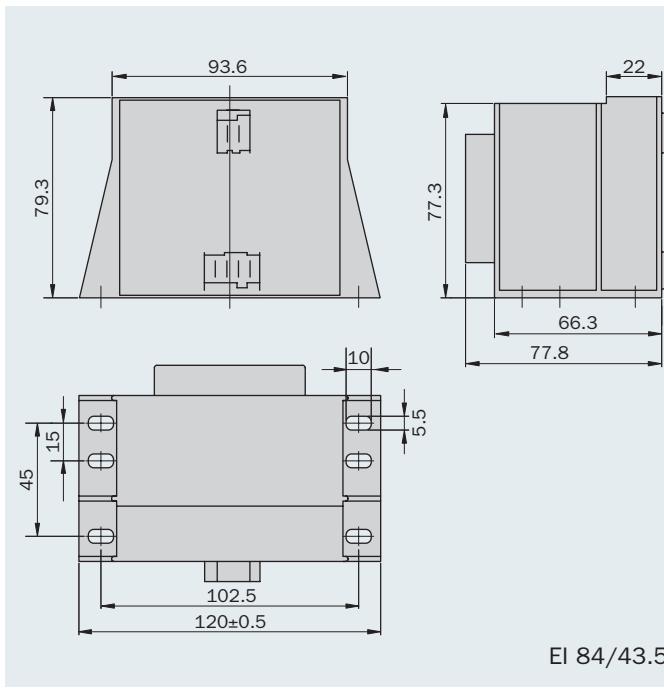

Frame size/Core height	Output	Temperature class
EI 78 / 27.5	50.0 VA	ta 70 °C/B
EI 84 / 43.5	120.0 VA	ta 70 °C/B

Assured Safety Standards.

All HAHN transformers are manufactured from well proven, long-term tested raw materials and produced on the most modern production equipment. All consignments are accompanied by a test certificate, thus assuring customers of the highest degree of electrical safety and long service-life for their appliances.

EI 78/27.5

EI 84/43.5

Available on request with the following attributes

– without tolerances ± 0.3 mm

Switch mode power supply-transformers customer-specified

The range of E-construction types consist of two basic versions:

1. Construction type with round medium limb

ETD-cores

EC-cores and ER-cores

2. Construction type with angular medium limb

EE-cores

EF-cores and EFD-cores

Numerous industrial power suppliers use HAHN transformers in their switching operations!

Based on the use of optimized components from HAHN Electrical Isolation System UL 1446 and the optimal winding, HAHN products are according to EN 60 950 and EN 61 558-2-16.

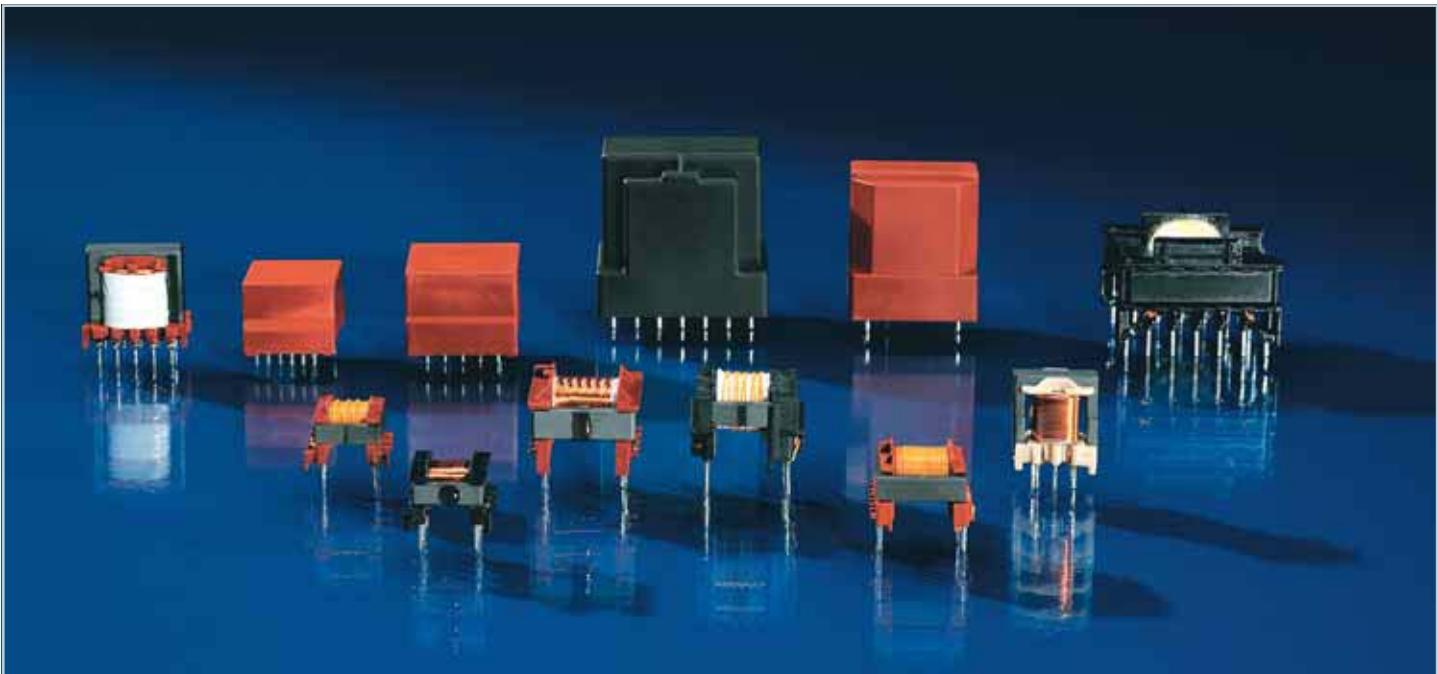

Our know-how and the special HAHN process for the production of open, impregnated and vacuum-encapsulated Flyback Converters provide optimal customer benefits. Lead-free, tinned and SMD variants ensure reliable connections. Our technical superiority and optimized automatic processes guarantee the reliable performance and functionality of all electrical components.

All Flyback Converters are produced according to your specifications. Short development times and high-efficiency production stand for the HAHN quality of our components.

Dimensioning programs from well-known IC manufacturers such as Power Integration, Infineon and ST-microelectronic coupled with our own developed measuring equipment make it possible for HAHN to provide you with your own customized components. Such solutions have proven to be rapid and extremely economical.

Flyback Converters for Switch Mode Power Supplies of the Type EF

HAHN Flyback Converters with the following characteristics:

- Construction to EN 61 558, EN 60 950
- operational frequency 10 – 500 kHz
- increased creeping distance 8 mm possible

Insulating material classifications

- E / 120 °C
- B / 130 °C (optional)
- F / 155 °C (optional)
- UL 94-VO (optional)
- 100 % unleaded

100 % piece inspections

- Inductivity
- Turns ratio
- Winding direction
- Voltage resistance (50 Hz/2 s)

Switch Mode Power Supplies with HAHN Flyback Converters

– can be employed for lower and middle range capacities with the structural size quantities EF 12,6 to EF 30. The use in manufacture of high quality core materials enables operational frequencies up to 500 kHz.

All HAHN Flyback Converters are manufactured to EN 60 950 and EN 61 558 standards. Considerable know-how and specialist experience in transformer technology for open, encapsulated, impregnated or vacuum encapsulated converters are guarantees for HAHN quality and optimum customer benefit. All converters are customer-specific finished to customer specifications.

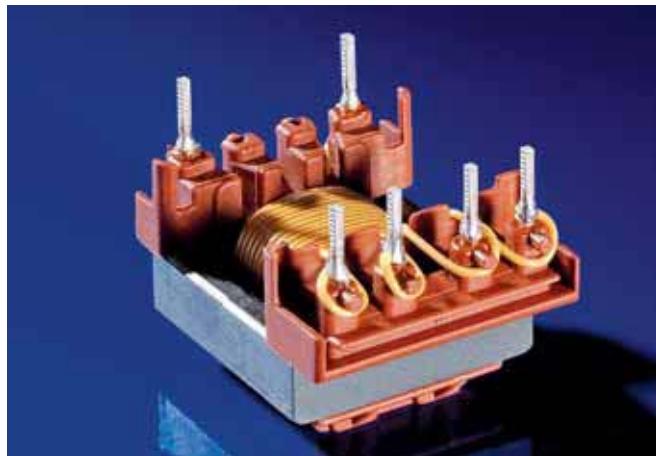

Current developments in electronic components involve ever shorter research and development time periods and every greater manufacturing reliability.

HAHN has the opportunity of optimally developing flyback converters for well known manufacturers of regulator controllers, e.g. Power Integration, Infineon, Philips or ON Semiconductor as customer-specific components. These were all rapid-, economic- and high quality problem solutions from HAHN.

Size	Capacity*
EF 12,6/4	up to 5 W
EF 16/5	up to 9 W
EF 20/6	up to 20 W
EF 25/7	up to 45 W
EF 30/7	up to 70 W

* Dependent on input voltage range and switch governor type.

Standard Flyback Converter of the Type EF 16/5

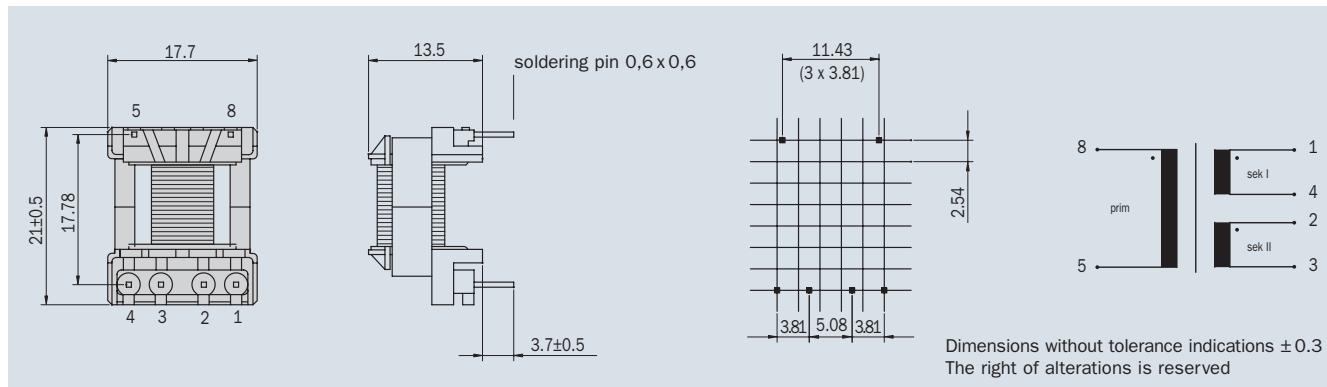

Technical Specifications

- Construction to EN 61 558, EN 60 950
- Creeping distance **8 mm min.**
- 100 % unleaded
- UL listed materials
- Insulation material class E
- Two outputs for connection in parallel or in series^(*)

100 % piece inspection

- Inductance
- Turns ratio
- Winding direction
- Voltage resistance (50 Hz/2 s)

Fine-wire-coils

HAHN has gained a niche in the market as a reliable supplier of application-oriented special transformer coils. Our customer contact staff are exceedingly well motivated and contribute extensively to the success of the business.

HAHN is already able to produce special transformer coils in all the various constructions types to consumer specifications.

HAHN will work together with the customer to develop all manner of applications to obtain an appropriate and viable problem solution. The high grade quality of HAHN products and the readiness of the HAHN organisation to provide an appropriate customer service are also contributions to the success of the business.

HAHN's secret lies in the employment of optimised components and the consequent exploitation inherent in the possibilities of hi-tech manufacturing. This enables specialty components in high grade quality to be produced in conjunction with many years of close collaboration with its subcontractors and suppliers as well as the benefit of flexible manufacturing facilities. HAHN's experienced research and development department and its special in-house tooling facility are guarantees for rapid and economic problem solutions straight from the HAHN works.

No matter whether small amounts or large volumes – the highly flexible manufacturing concept with extensively automated production equipment – makes it possible to meet practically any consumer requirement and to implement this materially and technically; and, this not only in a highly economic manner but also on a short-term basis.

Ignition transformers from HAHN

New!

For safe and stable ignition of gas heating systems!

- Circuit board assembly
- Compact design
- for unipolar or bipolar ignition
- for one or two ignition points
- stringent individual quality-testing
- self-extinguishing potting and housing material

Ignition transformers from HAHN guarantee safe and stable ignition of your gas-powered heating systems. Compact in design, they are ideal for use with printed circuit boards.

Within our comprehensive Quality Management System which includes several interim checks, each component is subjected to a final 100 % test. In this test, not only the characteristic data are checked but a high-voltage insulation test is carried out.

The specially selected components are all subjected to a glow wire test according to DIN EN 60 335-1:2005, section 30.2.3.

Electronic ignition devices from HAHN

New!

For safe and stable ignition of boiler systems in the heating industry.

Electronic stroke-spark ignition for use in gas-condensing boiler systems. High-performance ignition for oil-burning systems.

- Voltages 230 V~ and 120 V~
- Single- or dual-pole ignition
- One or two ignition points
- Quality is based on individual testing
- EMV according to EN 55014-1 and EN 55014-2
- Construction according to DIN EN 60335-1 and DIN EN 60335-2-102

Electronic ignition devices from HAHN are designed according to the highest requirements in heating and industrial plants.

Continuous monitoring of all process steps and the use of top-quality components guarantee safety, reliability and durability. All components are subjected to a 100% individual final check. Here, not only characteristic data are checked; integrated high-voltage tests are carried out that guarantee voltage stability. All ignition devices are compliant with current national and international standards.

For the user, national regulations are binding. Protection from electrical contact is the responsibility of the user.

We supply green power!

New!

Expanded coil program

The increasing requirements regarding the electromagnetic compatibility of network harmonics according to DIN EN 61000-3 has motivated HAHN to provide economical solutions for optimizing your products – whether by supplying alternative energy to networks or by reducing harmonics caused by conversion.

HAHN, with its vast experience and technical know-how, is now able to provide solutions in the form of a wide range of customized coils. The application areas comprise smoothing chokes, commutation chokes, power chokes, PFC chokes and storage chokes in various core materials such as laminated sheet metal, tape-wound core, iron powder and ferrite.

Whether it's a matter of designing a choke, optimizing connections and wiring, assembling via foot angle or top-hat rail G 35, our vastly experienced team of highly qualified development engineers will be able to help.

We supply green power!

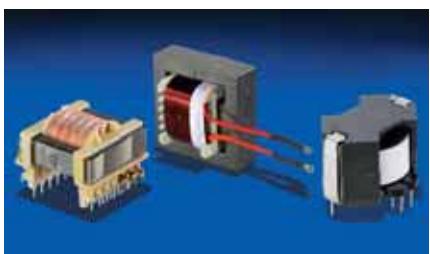

Laminated Iron Core Chokes / Tape-wound Core Choke

- Frequency range 0–400 Hz
- Current range 0–200 A
- Types EI 30 to EI 120, UI 30 to UI 120, Tape-wound core SUI
- Open, impregnated or vacuum-encapsulated
- Economically priced and customized to your own specific requirements with respect to design, fitting and contacting
- Minimum power loss
- High degree of temperature resistance

Iron Powder Core Chokes

- Frequency range 0–100 kHz
- Current range 0–30 A
- Types: toroidal or pot core
- Open, impregnated or vacuum-encapsulated
- Economically priced and customized to your own specific requirements with respect to design, fitting and contacting
- Minimum power loss
- High degree of temperature resistance

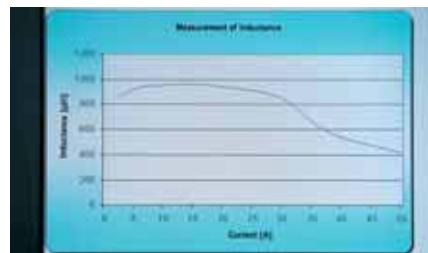

Ferrite Chokes

- Frequency range 10 kHz–1 MHz
- Current range 0–200 A
- Types EE 13 – EE 120, RM, PQ, UI to 126, toroidal
- Open, impregnated or vacuum-encapsulated
- Economically priced and customized to your own specific requirements with respect to design, fitting and contacting
- Minimum power loss
- High degree of temperature resistance

By using state-of-the-art measurement technology and through cooperation with a technical university in the area of EMC, HAHN is able to provide you with comprehensive support right from the beginning of your development work. This will save you time and money.

Power supplies from HAHN

Safety coupled with HAHN quality for your applications!

Should you need an AC or DC power supply?

These are available from HAHN with integrated components (residual ripple < = 5 %).

Today, our flexible production allows us to make transformers both with and without rectification. Special safeguards protect your products in line with the stringent requirements of VDE / ENEC and UL. Our highly qualified and experienced HAHN developers coupled with our own tooling facility guarantee rapid and economic solutions for you.

Our technical superiority, comprehensive Quality Management and interim testing programs for each individual component guarantee reliable functionality.

Our highly flexible production concept, proven technology and product experience makes it possible to fulfill and technically implement practically any individual requirements you may have along with the amounts you require.

Transformers both with and without secure insulation, automatic transformers and unregulated power supplies round off the HAHN product range. Our own development and production within Europe guarantee solutions with optimal customer benefits.

Electrical Power Supply Facilities by HAHN

custom-made bunch of cables

fuse elements

rectifier units

- Vacuum encapsulated dual chamber windings
- Excellent temperature fluctuation reactivity
- Highest degrees of safety and durability
- High degree of voltage-leak resistance
- Self-dissolving encapsulation- and bonnet materials
- Piece verified quality with test certificate
- Transformers conform to European Standard EN 61558

Following supply connector variants are possible

- Flat plugs
- Rast 5
- Terminal blocks
- Custom-made connectors

	Frame size	Output (max)	Dimensions (a x b x c)
AC	EI 48	12 VA* bei ta 70°C/B	
DC	EI 48	6 W* bei ta 40°C/B	
AC	EI 54	20 VA* bei ta 70°C/B	60 x 64 x 52
DC	EI 54	10 W* bei ta 40°C/B	60 x 64 x 52
AC	EI 60	30 VA* bei ta 70°C/B	66 x 67 x 60
DC	EI 60	16 W* bei ta 40°C/B	66 x 67 x 60
AC	EI 66	47 VA* bei ta 70°C/B	72 x 70 x 66
DC	EI 66	24 W* bei ta 40°C/B	72 x 70 x 66
AC	EI 78	60 VA* bei ta 70°C/B	84 x 76 x 74
DC	EI 78	40 W* bei ta 40°C/B	84 x 76 x 74
AC	EI 84	100 VA* bei ta 70°C/B	91 x 80 x 79
DC	EI 84	50 W* bei ta 40°C/B	91 x 80 x 79

* dependent on types of supply connection and circuit breaking facilities

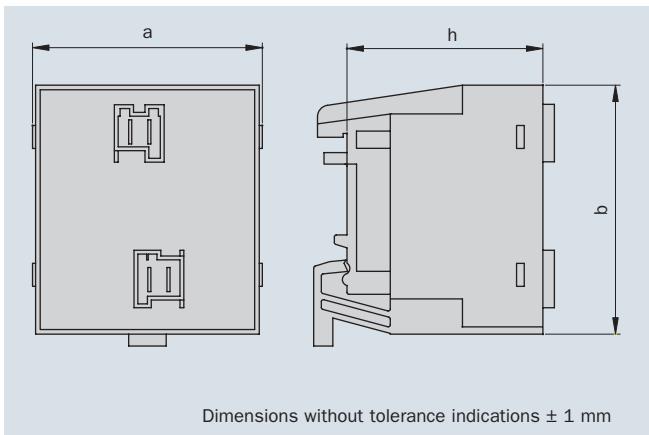

Top-Hat-Rail Transformer Fixtures

- Vacuum encapsulated dual chamber windings
- Excellent temperature fluctuation reactivity
- Highest degrees of safety and durability
- High degree of voltage-leak resistance
- Self-extinguishing cast housing materials
- Piece verified quality with test certificate
- Transformers conform to European Standard EN 61558

Following supply connector variants are possible

- Flat plugs
- Rast 5
- Terminal blocks
- Custom-made connectors

HAHN quality now available for Switchgear Cabinets and Domestic Supply Services

HAHN transformers are suitable for mounting in switchgear cabinets with the application of special encapsulation bonnets complying with German Industrial and European Standard: DIN EN 50 022 and equipped with snap-on fixtures.

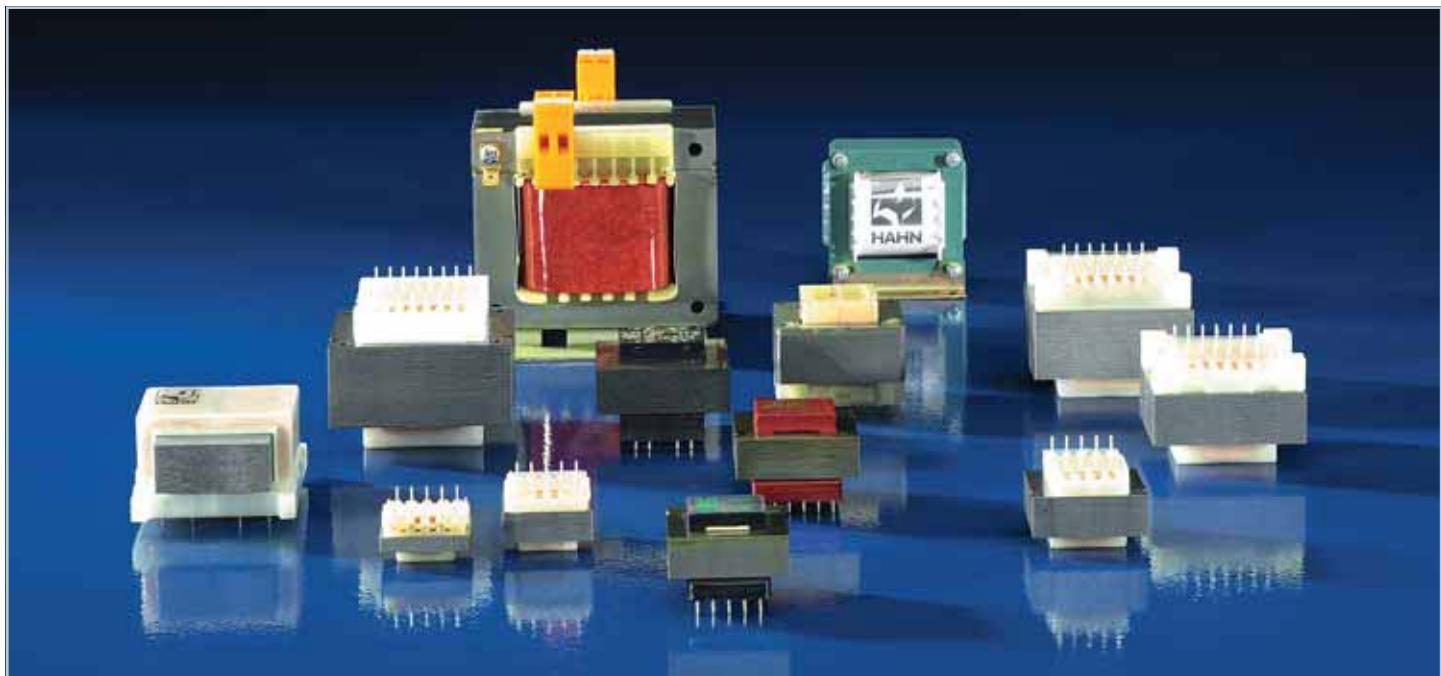

These encapsulated transformers stand for optimal durability and a rapid simplified mounting for such facilities. Ongoing quality control – even at the level of components – as well as 100 % piece verification ensures the highest degree of quality from the HAHN Works.

	Frame size	Output (max)	Dimensions (a x b x h)
AC	EI 48	12 VA*	52.5 x 59.3 x 45
AC	EI 54	20 VA*	60 x 64 x 52
AC	EI 60	30 VA*	66 x 67 x 60
AC	EI 66	47 VA*	72 x 70 x 66
AC	EI 78	60 VA*	84 x 76 x 74

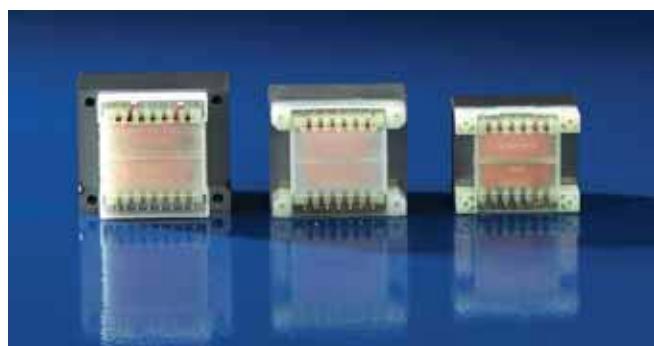

* dependent on types of supply connection and circuit breaking facilities

DC variants are planned

Non-encapsulated transformers – Separation to VDE 0570/EN 61558 regulations

Open single-phase transformers for the power supply of appliances and assemblies. For applications with restricted spacing, HAHN's unsealed transformers are a real alternative. New versions have been introduced by reducing the casing volume. Reduced weights lead to reduced costs and can be realized in the form of printed circuit transformers, size EI 30–EI 96 as well as UI 30–UI 48. Applications for switch cabinets can be fitted with the sizes EI 60–EI 150. Attachment facilities with angle pieces for top-hat rails are available. Impregnation with resin protects the unit against environmental impingements. The use of dual chamber bobbin windings guarantees an electrically safe galvanic separation to VDE 0570/EN 61 558 regulations. The materials employed meet insulation class B (130 °C) minimum. Class F (155 °C) is also available on request.
